

# CLAY AND HARD MODELLING INTERN

“Building something with a designer, from start to finish, is a point of pride. It’s exciting to create something with new technologies and techniques.” – Tobias, Hard Modeller

Give design a physical presence. Working with designers and other creative minds across KISKA's studio you will:

- › Support the modelling team throughout the entire development process.
- › Take on a variety of clay and hard modelling tasks. As well as painting, 3D printing, and prototype construction.
- › Enrich the team with your creative skills and outside-the-box thinking.
- › Create show bikes and other prototypes.

## TO MAKE THE MOST OF YOUR EXPERIENCE, YOU NEED:

- › Availability for six months. An open and creative mindset. The drive to challenge the status quo.
- › Passion for motorsports, transportation and product design.
- › Team player mentality and the motivation to gain insights about studio life.
- › Very good English skills. German is an asset.

It's the law in Austria to state annual salaries. In this case, it's €1,000 per month for an undergraduate internship and €1,200 per month for a postgraduate internship. KISKA is also an equal opportunity employer. It's a no-brainer, but important to mention.
